

Gene Research Center / Transgenic Plant design research initiative Seminar

December 9, Friday at 1600-1730
G Building (Biosystem Bldg) G502

1)Dr. Antonio Lopez-Montes (Head, Yam Program Unit; Yam Breeder IITA)
"Research for Development of the International Institute of Tropical
Agriculture (IITA) " [15min]

2)Dr. Melaku Gedil (Head, IITA Bioscience Center; Molecular Geneticist/
Molecular Breeder)
"Application of next generation technologies to genetic improvement of
African staple food crops at IITA" [15 min]

3)Dr. Hiroko Takagi (Japan International Research Center for Agricultural
Sciences)
JIRCAS-IITA Collaborative Research on Yam: "Use of genomic information
and molecular tools for yam germplasm utilization and improvement for
West Africa" [15min]

4)Dr. Satoru Muranaka (Japan International Research Center for
Agricultural Sciences)
JIRCAS-IITA Collaborative Research on Cowpea: "Strategic approach to
develop value-added cowpea varieties with higher food and nutrition
quality" [15min]

Discussion for 30 min.
